OBJECTIVE

Enthusiastic Full Stack Developer with hands-on experience in Python, Django, React.js, JavaScript, HTML, CSS, and MySQL through academic projects and professional training. Skilled in developing responsive web applications, implementing CRUD operations, and integrating frontend with backend technologies. Passionate about building scalable software solutions and continuously learning modern technologies.

EDUCATION

AMC Engineering College – Computer Science – Data Science, B.E – Bengaluru, India Dec 2022 – Jul 2026
CGPA: 7.2

EXPERIENCE

Dhee Coding Lab – Python Full Stack Trainee – Bengaluru, India

Jan 2026 – July 2026

- Developed responsive web pages using HTML, CSS, JavaScript, and React.js.
- Built Django-based web applications with CRUD functionality
- Integrated frontend interfaces with backend databases

SKILLS

Programming Languages: C, Python, JavaScript

Frontend: HTML5, CSS3, React.js

Backend: Django, Django REST Framework

Databases: MySQL

Tools: VS Code

PROJECTS

Smart Irrigation System Using AI and IOT

Technologies: Python, IoT, Arduino, Soil Moisture Sensor, Cloud Analytics

- Designed and implemented an AI-powered Smart Irrigation System using IoT technologies for precision agriculture.
- Collected real-time soil moisture data through sensors to enable automated irrigation decisions.
- Applied cloud-based predictive analytics to enhance water conservation and support sustainable farming practices.
- Developed monitoring dashboards with automated notifications to improve crop productivity.

Text-to-Speech Converter

Technologies: Python, PyPDF2, gTTS

- Built a PDF-to-Speech Converter in Python that extracts text from PDF files and converts it into natural-sounding audio.
- Used PyPDF2 for reliable text extraction and gTTS for speech synthesis.
- Enabled seamless document-to-audio conversion to improve accessibility and usability.

Task Management System

Technologies: Django, Python, HTML, CSS, Bootstrap, SQLite

- Developed a task management web application using Django following the MVT architecture.
- Implemented complete CRUD operations for efficient task management.
- Used Django ORM to interact with the SQLite database for storing and retrieving task data.

CERTIFICATIONS

- Python Full Stack Development
- Aptitude and Soft Skills Training Program
